

CANADIAN REPORT:

2/3/2012 \*\*\*OPIS MORNING PREVIEW: MARKET HIGHER BUT DANGERS LOOM NYMEX/GLOBEX PREVIEW . . .

West Texas crude lost ground again on Thursday though the market did rebound from deeper early-day declines. Still, front-month WTI finished below the \$100/bbl mark for the tenth consecutive session. Over the last month WTI has surrendered almost 7 percent of its value.

Brent crude managed to close higher and the WTI/Brent spread has gyrated back to some \$16/bbl, baffling the experts who predicted the spread would narrow to under \$10/bbl for a sustained spell.

WTI's decline is easy to understand. Stocks of crude have piled up and there is a sense that Mid-continent refiners may have to trim back because demand is sluggish. We did see some production cuts for some products of as much as 16 percent in the latest DOE tabulations. Obviously, run cuts would increase crude stock levels.

WTI and Brent crude prices are higher overnight as the market anticipates a positive jobs report from the Department of Labor.

Some are predicting that Brent crude will fall below \$100/bbl in the first quarter and to \$75/bbl next year, based on the demand destruction both in Europe and the U.S.

Capital Economics said it expects Brent to fall to \$100 by the end of this quarter and to \$75 by the end of next year, according to a report from the Associated Press.

Gasoline lost value on futures and physical circuits. Even Brent's strength couldn't nudge U.S. spot gasoline prices higher. The gasoline market is wallowing in the long shadow of very poor demand.

We would note, however, that since the beginning of the year Gulf Coast spot gasoline prices are up some 25cts/bbl, based on OPIS weekly averages. Only Group 3 jet fuel compares to the breath of this increase. Gulf unleaded prices have outdistanced Chicago almost four-fold.

So it should not be surprising that gasoline returns some of its early-year strength.

Even with gasoline prices dropping, the OPIS weekly five-day average prices are 4 to 12cts/gal higher than prior week. The heftiest gains are in the Midwest where prices have been the cheapest.

Overnight gasoline prices are up almost 2cts/gal in the futures markets and the April and May contracts are back to \$3.00/gal.

Distillate prices haven't shown the same energy as gasoline either in the most recent week or since the start of the year.

Futures prices did gain on Thursday against crude's weaker posture but futures prices over the last week have shown only modest swings.

Prices are up almost 1.5cts/gal in overnight trading.

CASH MARKET OVERVIEW . . .

Sunoco CEO Lyn Elsenhans will step down and be replaced by current chief financial officer Brian P. MacDonald, effective March 1, 2012, the company said. Meanwhile, the East Coast trading market learned that the company will keep its Philadelphia refinery open until July.

There had been some speculation that Sun might shutter the refinery early in the second quarter. However, a company press release notes that there has been interest in the Philadelphia plant, and Sun will continue to pursue a sale. If a buyer is not found, the facility would begin idling processing units by July.

East Coast spot prices have been among the most expensive in the nation as the market becomes more dependent on outside sources for oil with refineries closing.
